Zillion Technology

Re: Quality Funding Programs Module Project

I wanted to take a moment to let you know how pleased I am with the services your company, Zillion Technology, has provided. The new pages to my website were completed exactly as my proposal depicted and the code is very well written. Your company provided me the PHP scripts and databases as per the parameters required, and you met the deadlines in a timely fashion. Your communication was exceptional. It was concise and polite. This was also the case with Neville, as well.

Your efforts have saved me considerable time and I'm certain the finished product will help in my business and my customers whom will enjoy a more robust experience while visiting my web site.

I am in great appreciation and looking forward to working with your company again in the very near future and will recommend your services to anyone seeking web development.

Sincerely,

A handwritten signature in blue ink that reads 'Jason Shapiro'.
